

Circular Economy and Waste Management

A wide-angle photograph of a massive, unmanaged landfill. The ground is completely covered with a chaotic pile of waste, including plastic bottles, cardboard boxes, crumpled paper, and various pieces of trash. The waste extends far into the background, creating a sense of scale and environmental neglect. The sky is a pale, overcast grey, and the overall scene is one of environmental degradation.

Landfill  
Management  
is poor

## Recycling is not the silver bullet

Recycling was sold as the silver bullet, but the recent ban from China has exposed the hidden truth about recycling, that recycling alone is not sustainable

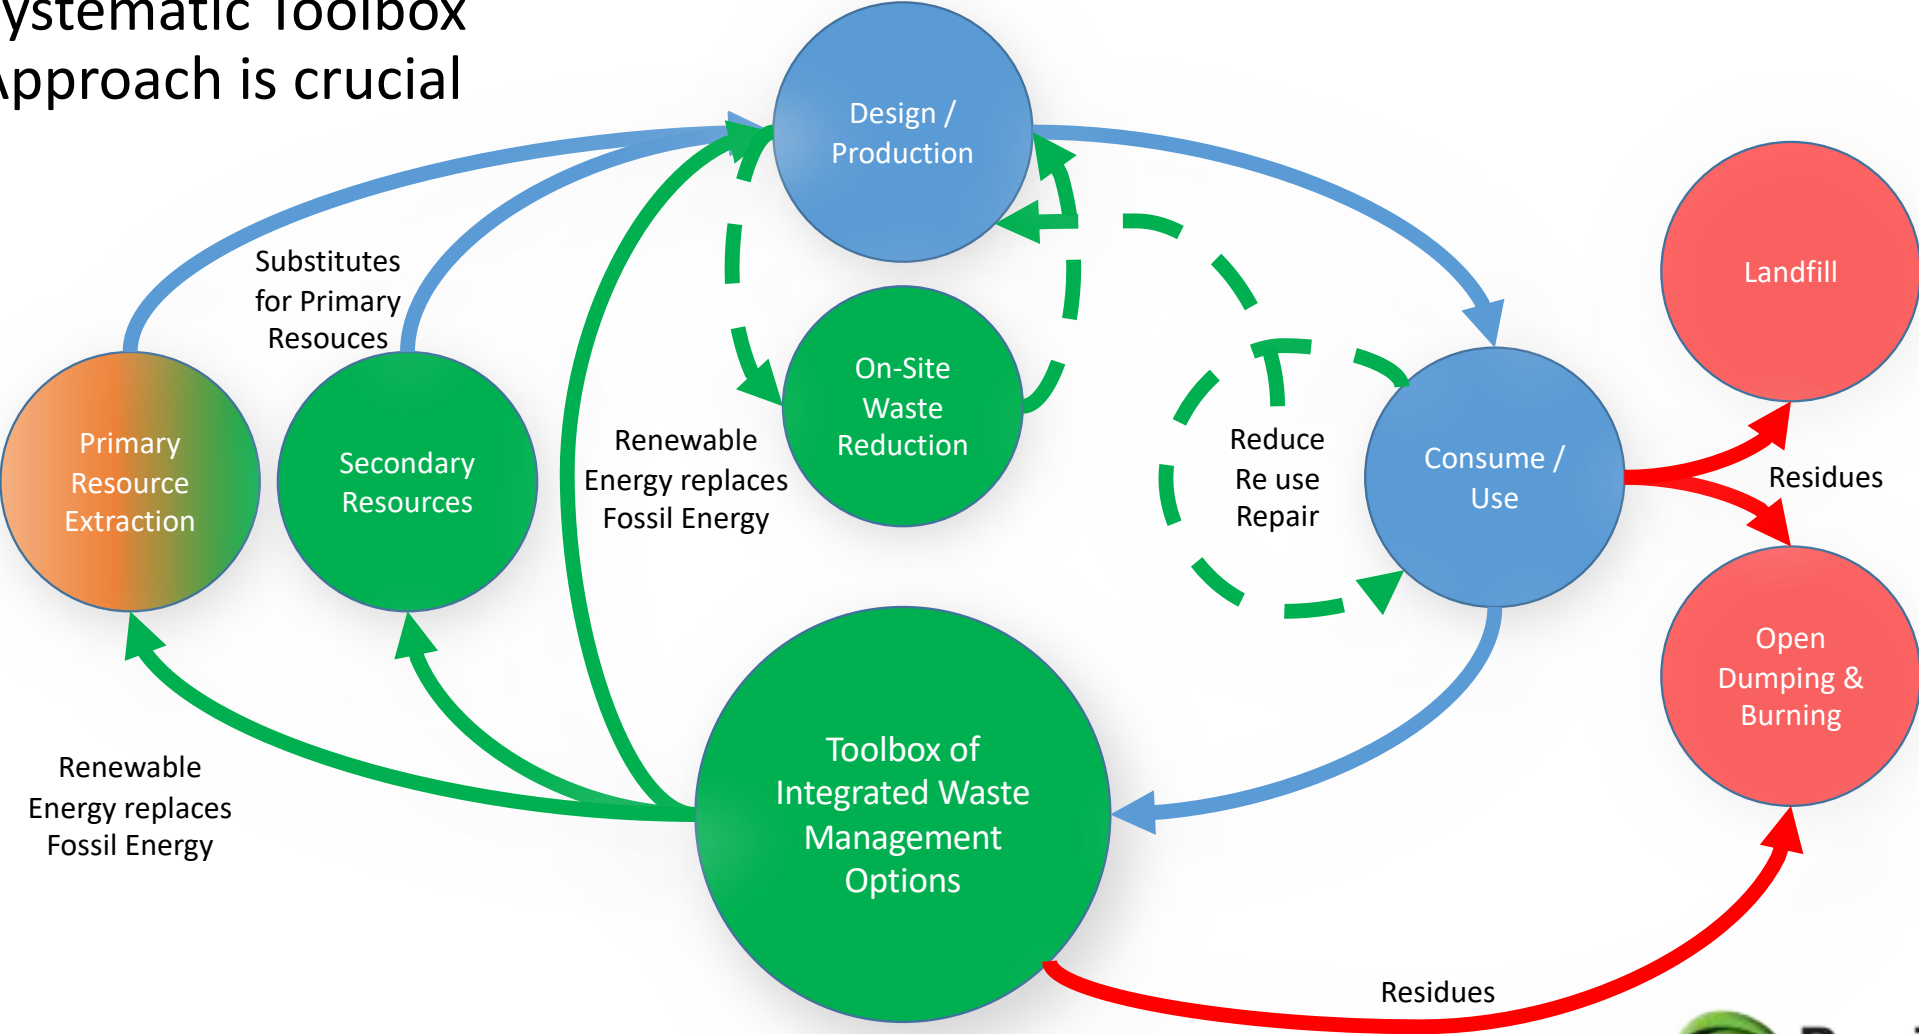

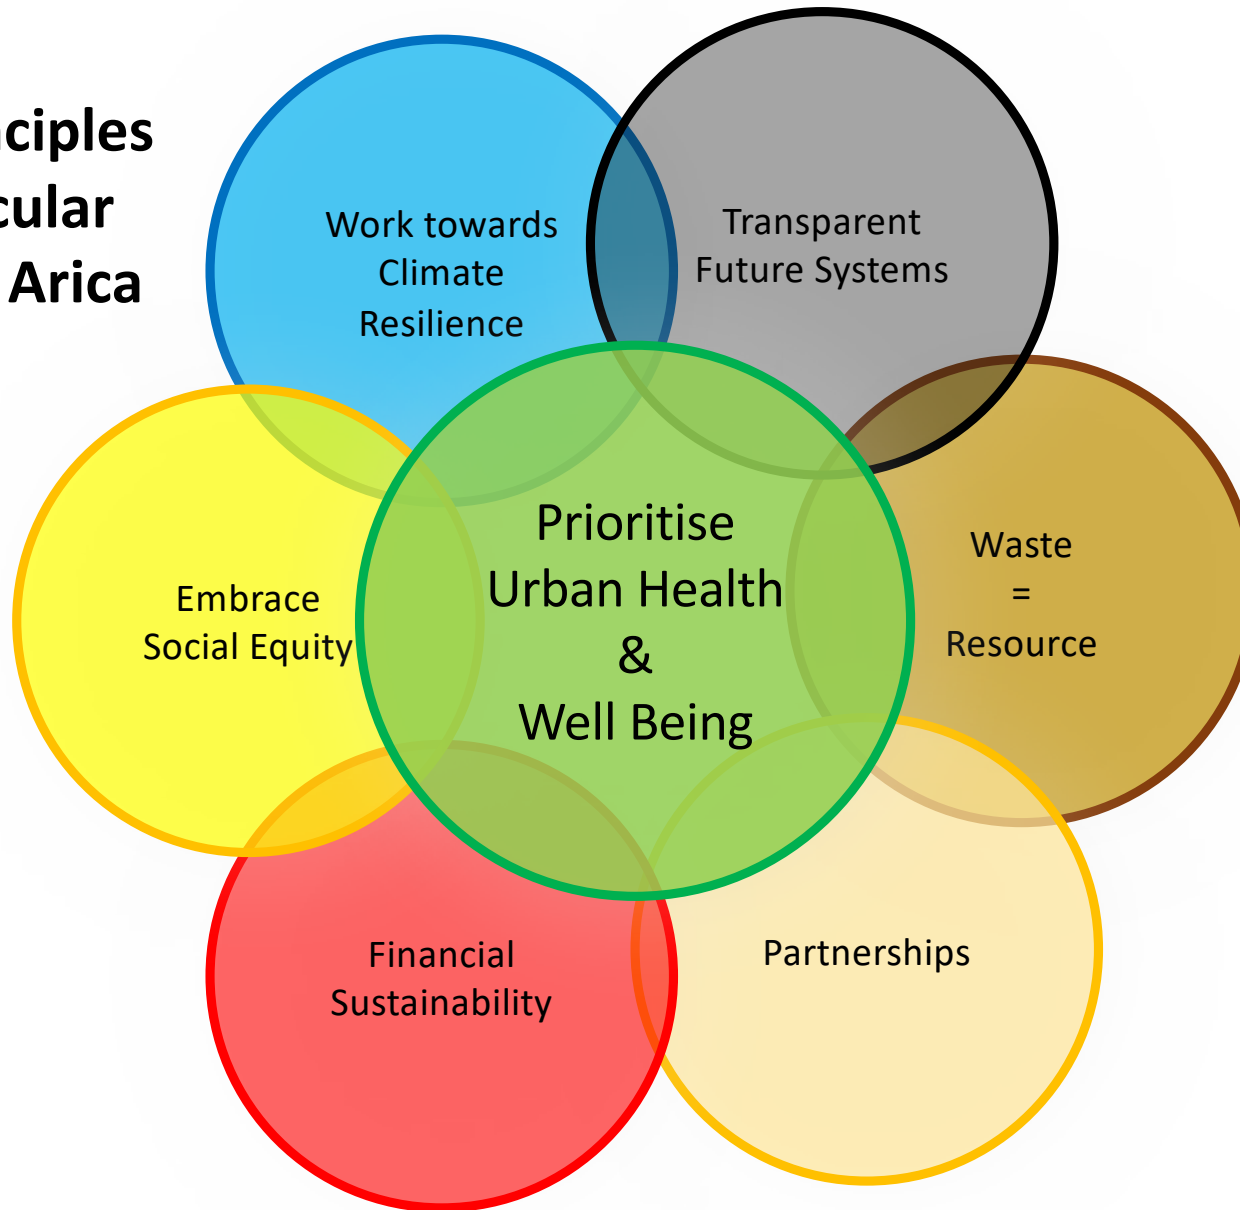

## Social Aspects

Landfill pickers are a perceived social problem, but we need to turn this into an opportunity
